House Management – The Ultimate Skills

Our approach to training

Polo & Tweed believes that the quality of the training is key to deeper understanding. We teach in either private one-to-ones or small groups, as we believe that this way the student is able to ask as many questions and spend as much time as they require on the areas they find challenging. Each student is unique, and we understand that with many students English is a second language, therefore we give them the support and guidance they need. Practical application is key, and although we encourage students to take notes, we focus the training on practical application. After all service is a fine art and must be practiced until perfect!

Very fast correspondence on the first email contact and subsequent contact over the phone, gave me a very good sense of seriousness. The conversation was fluent from beginning what indicated a certain level of professionalism. This relationship continued throughout the training and reflected on the learning content it self. Training for yacht and house management was a compact course that helped me organize my experiences in a perfect order. The script we received can also be used as a template and is a good basic tool for further work. Alex and Lucy rounded up my positive experience with sharing their knowledge with us and giving me useful advices. I am thankful and I would recommend Polo & Tweed training programs anybody in this industry for a refresh or to learn something new.
